Also a delivery driver to deliver your sundaees.5 ★: It's addictive. I was playing this game on the laptop, but not anymore. The performance of the game is in good condition. Nothing to complain5 ★: Just like the original. I don't mind buying these games as an adult for nostalgia factor considering all the joy they brought me as a child. It was a great distraction in such terrible times to play my favorite flash games. Bless yer hearts3 ★: The game is quite average and obsolete. It is not the same thing that is on the PC version, most of the ingredients are already unlocked. That kind of debunks my plans for what I was about to do. Besides, there is no clothing (hats) and no wallpaper as there was before on the PC. Quality is fine, just a little blurred. It's the same every day, a new client, a new ingredient. No mini games and no holidays. Just the same boring day.5 ★ job: This game was fantastic. I'm just a little hesitant to play too much because if I change my phone or something that all the rescue data would be done. Can you make the rescue file more accessible or give us an option to backup your rescue data? Currently it seems that we need root to access the save.5 ★ file: Very funny to play one ofpopp games on the easier side, while not as meat out as the most recent 1.99 games its still as fun and a great addition to the series3 ★: I loved all studies of flip rows work, but it is so sad to see no update on the graphics or features. I didn't think my money was worth spending on the game.5 ★: Awesome game! So addictive and fun! At first I was nervous to find out that the controls are bad, but they are not really! Totally worth the few dollars to play in the best experience without getting ads every 2 minutes!5 ★: Very nostalgic just as I remember. Some things are different, but I'm not sorry. I'm glad they made a mobile app.3 ★: Great game, but it's the same game every time, every day. Once you bought everything, there's nothing to look forward to. No mini games. New customers with the same ingredients, going through the same movements. As a more pleasant customer service job!5 ★: I absolutely like this game, but there is no Shop option on my game. The other two have this option, but the one I've been playing for 2 years has not that option3 ★: I really hope we can get more than 6 customers also have everything. I need more challenging as what I played on computer before.5 ★: I really like this game.. we can get the free taste n many costumes. even free clothes if u win the mini game. thanks/tq for this game. I really enjoy it. ☺ ★: Best game to play again in 2020 the price is worth andit was beautiful.5 ★: Omg this game is fantastic!!!! I like that reminds me of the time I was at school and I would play this game every single day!! This has been EBIC I love this perfect review game!!! Although on computer I don't think you need to buy it is but it's worth it!!! FAQ: What is a APK?A file: An Android package kit (APK for short) is the package file format used by the Android operating system for the distribution and installation of mobile applications. Just like Windows (PC) systems use a .exe file for software installation, Android does the same. Q: Why can CloudApks.com guarantee 100% secure APK? A: Whenever someone wants to download an APK file from CloudApks.com, we will check theAPK files on Google Play and allow the user to download it directly (of course, we hide it on our server). If the APK file doesn't exist on Google Play, we will look for it in our cache. Q: If I install an APK from CloudApks.com, will I be able to update the app from the Play Store? A: Yes, absolutely. The Play Store installs APKs downloads from Google servers, and sideloading from a site like CloudApks.com goes through a very similar process, except that you are running download and install startup (loading the side). As soon as the Play Store finds a newer version of the app than you have sideloaded, an update will begin. Q: What are Android application permissions? A: Applications require access to certain systems within the device. When installing an application, you will be notified of all the permissions needed to perform that application.
