## God of war ascension all collectibles

God of War Ascension has a total of 52 collectors. 10 artifacts7 baskets decayed15 phoenix feathers20 Gorgon General Eyes Information: Advertisement If you forgot something you have to replay all chapters from the point where you lost the collector. The only exception is artifacts. These are stored in a different save game and are saved instantly and you can use select chapter to collect them in any order you like. There are also more white colored treasure chest with feathers and eyes than needed. So if you missed some of them don't worry. There are at least 5 crates of every kind you need. Only the fallen bonnets are really missing. So make sure you reconstruct them all in the correct order. The difficulty is absolutely irrelevant to collectors. You can take them on any difficulty. Objects: Items are special character enhancements that are activated within the game by pressing the L2 button. Elements are used in every multiplayer mode. Each article enhances/bases a character capacity for a certain period of time and then requires a cooling time before the player can use the item again. Objects are very important because they offer an escape property when activated. This escape feature helps you move away from being pressured, bent, or dominated by other players and can be activated during the middle of a combo thus stopping the dead assault in its tracks. When the item is activated thus activating the escape component, the character is given a fraction of a second of invincibility. Use your items wisely because most take at least a second to cool off for a second use. The Cooldown's reduction position in the character legend helps to reduce the time it takes for an item to cool down. Each item can be classified twice. Each item is at the top of Rank 3. Every time an article is classified a new buff is given. Each God offers 4 different items for a sample to choose from. Choose wisely and watch your enemies fall at your feet and blood and glory will be yours! \*It is important to note that each item is unlocked depending on the level of the samples. After unlocking each item you must purchase the unlocked item using XP points reached in all multiplayer modes. Item name Property Restoration battle horn active instantly invulnerability. Restore +12 HP. +45% PP for 8 seconds. Cooling: 60 seconds. (Rank 3) Call To Arms instantly activated invulnerability. It creates a radial shockwave that disables enemy blocks for 8 seconds.
