John Pinel (Author) John Pinel, the author of Biopsychology, obtained his Ph.D. from McGill University in Montreal and worked briefly at the Massachusetts Institute of Technology, before taking a faculty position at the University of British Columbia, where he is currently Professor Emeritus. Professor Pinel is an award-winning teacher and the author of over 200 scientific papers. However, he feels that Biopsychology is his major career-related accomplishment. "It ties together everything I love about my job; students, teaching, writing, and research." Pinel attributes much of his success to his wife Maggie who is an artist and professional designer. Over the years, they have collaborated on many projects, and the quality of Biopsychology's illustrations is largely attributable to her skill and effort.
