Discrimination RACIAL / ESTANY AND SAID: Findings of Community Studies. *American Journal of Public Saude*, 93 (2), 200 Âng 207.Pubmed of the article is in the Ancentil of the 85th percentile (classified 19,296) 133.035 Tracked articles of a similar age in all periodicos and 75 percentile (3nd 3rd 3rd) of the 8 articles screened at a similar age in the Journal of Religion and Health View more about Altmetric Calculates a punctuation based on attention Online that an article receives. Each colorful line in the circle represents a different type of online attention. The number in the center is the altetic score. Social media and media of mainstream news are the main sources that calculate the score. Reference managers such as Mendeley, are also tracked, but do not contribute to the score. Older articles usually punctuate louder because they have had more time to be noticed. To explain this, Altmetric included context data for other articles of a similar age. Life Blog a e University of Chicago Medical Center This list highlights articles and blogs of individual traditional news that cite the article. Not all news and blogs link to articles in a way that altete can pick up, so they are not representative of all the other. Altética are responsible a e a e
