Even though Clash Of Clans Game is a free-to-play game, players still face several issues, who work hard to progress further. For instance- As we move on to a higher Town Hall, the upgrade costs (Gold/Elixirs) of various defensive and storage buildings increase, making it difficult and time-consuming for the player to collect and move ahead. Excess upgrade times taken by the buildings as they are level up adds up to worsen the player's problems since they have to wait for longer times to get the desired village, which is not desirable. It is challenging to collect Gems in the game since these provide either clear obstacles from your base, builder base gem mine, and exclusive events; this isn't sufficient. It's the same as one vs. one war but, here you have to battle seven groups and the team with the most wins/stars win the match/war. With the multi wars on the phase, the store has brought up some cold magic spells which you can claim by winning multi-battles. Losing the war will result in the loss of war perks, which means your clan will eventually get demoted if your loss ratio will be higher than the win ratio. It means if you're in a level 10 clan and you lose too many wars, there is a chance that you may get demoted to level 9. Rules to be followed:- The highest number of stars obtained by a team in the overall tournament wins the war. You can only attack once against a team, which means no second chance. Choose your base wisely. There are 24 hours to attack. Meanwhile, the preparation day has already begun with the next team so, fill in the troops. How to Install Clash Of Clans Mod Apk On Android?
