Dell latitude e6410 broadcom ush driver windows 7 64 bit

Just a stab in the dark, but did you think to go to www.dell.com/support, enter your service tag number, and then get all of the drivers you need from there? Hi Grey, Thanks for your reply, there are so many drivers and can you tell me which one has to be installed? shinekumar wrote: Hi Grey, Thanks for your reply, there are so many drivers and can you tell me which one has to be installed? No. As an IT Pro in this community, you should be able to do this. Installing drivers is a basic foundation and crucial to your IT knowledge and skill base. If you are having trouble picking out an 'unknown' device, you could try using the UDI from  and see if it can provide a more concise description for your missing drivers. I cannot, without having the system in front of me or performing a screen share (and charging you as a customer for my time), give you any more information than I already have. This is a tricky on to find actually From memory... In the drivers for the e6410 its in the security section, as the ControlVault driver For all those small problems related to any lack of support regarding operating systems or devices not supported by Dell, this how-to could be enlightening: -. Agreed with Martin2012. Broadcom USH is a security driver... tricky to find! Broadcom USH = security (even if no fingerprint reader is installed...) Sometimes it is easier (faster) to download the "big pack", unzip *.cab und point Windows driver search to this folder ... Martin2012 has got it spot on - the Broadcom USH driver is called the ControlVault Driver. For Windows 7 64-bit, please download the driver .exe from here: I run into that myself a lot. Seems that the automated tool doesn't even pick it up either. Just one of those things. Thank you all for your valuable reply !!! It got fixed from the link provided by JohnC@Dell ... Thank you John... I'm glad that the link helped! Remember to mark Martin2012 as the best answer on this one as he was spot on with this one.
