There are games that create a lot of expectation even before being officially released, either because of the pints that the title has or because of the popular name it carries. From that moment, two things can happen: it meets those expectations or it falls to the bottom of the well. It is what remains to be discovered after download Project Cars GO. After so many months of waiting and much development, it seems that the light at the end of the tunnel is approaching. Gamevil will be able to bring the famous driving saga from desktop to mobile devices, but not without first going through an arduous process. We will see if this title follows the simulator line that it has carried up to now, or if on the contrary it changes plans on Android. Developer: GAMEVIL Price: Free Previous registration to download it on Google Play If the mountain does not come to Muhammad, Muhammad goes to the mountain. Most Android games end the Play Store, either on their own initiative or because Google throws its tentacles if the product is worth it (like happened with Fortnite). What varies is the way to get there, the decision of which is only the responsibility of the developer. Some decide to create a public beta program, which can be published on Google Play or not; early access, which is just the step prior to the official launch; or directly publish the development in the store without preliminary, but with a pre-registration. This is what Gamevil looks like it's going to do with Project Cars GO, using the previous registration that enables Google Play. This option allows users to be notified of the launch of the game in the store, as well as the possibility of having it installed automatically. In parallel, Gamevil recommends unsubscribe from the beta program before installing the final version, so that the reset of the game is total and not have problems. Therefore, if you participated in this phase (although it was only available in Finland, Sweden, Denmark and the Netherlands), you must uninstall the build in Settings> Applications> Google Play> Storage> Clear data and Clear cache. What awaits us when we download Project Cars GO More than a suspicion for the element »GO», it is a reality that Project Cars GO it will not be a pure simulator as we are used to in video consoles. What Gamevil assures us is a similar experience with gameplay adapted to mobile phones. This translates into one-touch driving. It seems that we will not have a simultaneous control of the accelerator, brake and steering. In this way, it is committed to a simpler system, imitating others titles like Forza Street. Yes, we will be able to make combos when braking and skidding, an element that can add excitement to racing. A lighter title than previous editions and with many arcade touches that, at least, does not skimp on cars and game modes. In this way, we can collect and customize GT3 cars, exposed wheels, prototype, road, vintage and many more. All this content can be enjoyed both in the world championships, time trials, special events and of course, online. Pero lo ha hecho como Project CARS GO, un juego que respeta en buena medida el impresionante apartado gráfico, pero que simplifica el control de los vehículos. Un solo toque para controlar el coche Este juego nos ofrece una experiencia más arcade que de simulación, por eso el control de los vehículos no depende tanto de nosotros y se limita a unos simples toques de pantalla. Estos serán los que nos servirán para acelerar, cambiar de marcha o reducir la velocidad en función del tipo de tramo al que nos enfrentemos. Deberá ser suficiente, si conseguimos controlar nuestro coche, para atravesar los diferentes checkpoints logrando los mejores tiempos. No cabe duda que es un juego muy recomendable si no buscas experiencias excesivamente realistas, si lo que te va más es la adrenalina de la acción y la velocidad. Estas son sus principales funciones y características: Controla el coche con un solo toque. Compete en diferentes trazados, tanto abiertos como circuitos cerrados. Desbloquea nuevos escenarios a medida que ganas carreras. Diferentes tipos de competición. Colecciona coches. Personaliza tus vehículos con todo tipo de accesorios.
