Jun 18, 2021 Version 0.510 Improved Event Highlighting\* The red notification bubbles throughout our game now do a better job of showing what's new...and then disappearing when you've collected rewards or seen our latest content. This should help you navigate WWE Champions 2021 with greater ease. Spinebuster! Elbow drop! Scissor kick! We love the way WWE Champions connects puzzle play and ringside action—letting us use specific color-matches to trigger bone-shaking moves. And its superstar-filled roster and playful attitude are pretty great, too. As The Miz would say, this game is "AWWESOMMME!" Omg, had an issue with loading asset bundles for paul orndoff. After an update it worked. Fir the first time in almost a year was able to complete saturday mornings in both easy and hard.Niw with recent update which i just acquired, today, saturday 3rd march, the error has returned. Geeeessssss. Just killed my mood. One of the best games i've played. But seems that one issue that i have had on my iphone device is that i keep getting error loading asset bundles when trying to play against paul orndoff.Twice have written to support but the issue still remains for almost an year now. Still love the game but with this issue faced every saturday, slowly loosing interest, dont know if anyone has this issue but thing of trying out other games like mayhem.. Dust: new feature allowing you to dust your unwanted draft cards after a match and fill your dust meter to gain access to a slew of new higher-tier picks. This might be the best game on the App Store. This is a great game all sorts of different games like Money in the bank, Royal rumble, woman's Royal rumble,King of the ring, Election camber, and much more. I think the most common one is wild where you you cane fight with your top six cards if you get a WWE Xbox or PS4 game you cane get awesome card like for WWE 2k20 I got four epic cards. And if you win a game like Money in the bank you get points to get cards like nightmare Becky lynch. But if you win a wild you get to pick random cards. But the problem with that is most or all of them are pretty bad maybe that's just for me because I have great cards my top one is over 7000 power alone. You also get a card pack that have ok cards in it you can get superstars from RAW, SMACKDOWN, and NXT. So for me this game super fun and each bay you loge in you get one bay if you get five bays you get a free card pack if you get a ten bays you get better card pack and so on. And now you can upgrade your cards from the training center and their is so much stuff in this game that I bid not tell you about so I rate this game at lest 5 STARS. First and foremost I love how this game is like wwe just with cards. It reminds me of the old days with my Yugioh and Pokémon decks when I had more sight and plaid with a magnifier. There is something I want to address 2k and this is an on going issue. I am not asking you to change your games, not at all, but rather release updates that will give support to voice over when reading the menus and when there is an arrow pointing to a card that can even be tweaked, outside voice over it would be the same, i have tried games with voice over support and it simply has voice over tell you what to do, like tap to the right, swipe etc. This could be implemented and with full voice over support for text menus and reading menus and directions put out to voice over to tap to the right or left i think its usually the left but I'm not sure sinc e i can't see it. I have tried trial and error tapping places. With the facebook somehow it supports being able to sync the game and login using Facebook but that was accidental since i could not really read the screens. If this game was made to support you would have many blind people who love WWE playing this and maybe some buying the card packs. I really wanted to buy some packs like I wanted to jump over all the battles and see if i could buy my idle Paige and I wanted that Wrestlemania pack that was sale but found no point since I can't play. I just get the alert in my notifications. Ok first off I love this game and I'm shattered + and I have been playing this game since it released so I'm a veteran but one thing that I keep on noticing is that on every update the glitches don't get fixed with the pulls from the draft board like when I got to shattered tier it took me a while to get my free pull and when I turned shattered + I don't get a free pull but sometimes it says waiting on network for a couple of seconds then give me the card this is starting to get on my nerves a little but I know y'all can fix this but is there a way to maybe update the game with trading cards to because I know y'all have been getting a lot of feedback saying that and it would be cool to trade with people across the world but it obviously has to be a even trade for it to happen if y'all do add this then this is going to be a money grabber lol but I barely spend money on this game for packs because I grind for everything instead of taking the easy way out but hopefully y'all fix this The developer, 2K, indicated that the app's privacy practices may include handling of data as described below.
