Read the poem and answer the questions given below

Correct answer: correct answer: JHM CARELELINK is a web-based application for the connection of JHM membership organizations to Community practices. Through JHM Carelink, community users can get secure access to select patient information in the JHM EMR data repository and improve the continuity of care. This continuity provides many advantages for our patients, including the following: provides a more transparent flow of information among doctors. It makes it easier for external doctors place referrals and orders to JHM. It connects doctors at JHM with specialists who use e-visits, providing assistance to a larger group of patients. Let JHM sends releases of electronically information to community clinics. Due your community clinic access to review the patient's graph for coding and the following claims. It allows the coordination of social services outside JHM. JHM CARELELINK is not an EMR solution; It is a more read-only application with some services-oriented functionality, such as entering the order order and the health orders of the co-signature home. JHM CARELELINK provides reference doctors with access to their patients à "e à" e Medical records for 90 days after a medical consultation, laboratories or image tests, outpatient visits or hospitalization at the Johns Hopkins hospital, Johns Hopkins Bayview Medical Center , Howard County General Hospital, Sibley Memorial Hospital, Johns Hopkins All the ambulatory services of the Children's Hospital and Johns Hopkins Hopkins. It is also possible to order a speciality consultancy to be programmed by the patient. Community users outside JHM that need to review the clinical and administrative information of patients observed within Johns Hopkins's medicine membership organizations. Users of the Community could include the following: the reference doctors referring to medical doctors contracts the doctors of the Community of the doctors and their staff of support Legal offices or agencies that require documentation through the healthcare organizations based on the community and public health not There is no cost associated with the use of JHM Carelink. Internet access using a commercial browser like Chrome (recommended) or Safari. The use of Internet Explorer is discouraged. You can request JHM Carelink access for clinical staff, non-collection staff and office administrators in your practice. Every staff member will have to enroll in Johns Hopkins Carelink, electronically sign terms and conditions and respect the patient's privacy rules. You and your clinical staff, including assistants, nurses, nurses, administrative staff and office manager will have access to your patients' medical records. At least one person on your site must be designated as a site administrator, which will have further administrative responsibilities. Self-service password reset (available 24 hours) the site administrator can reset my password? Yes, the site administrator can reset your password. I forgot my password and / or my challenge questions. Please call the help desk, available 24/7 at 855-284-5465 and ask to open a Carelink ticket for the reset password. Please allow up to 48 hours for the processing of the request. We strongly encourage you to set the challenge questions so you can automatically restore the password via self-service. Since you already have access to the full version of the epicha when you are in the hospital, please use the cart supplied on that version. Contact local technical support. The printing feature is not controlled by Carelink. You need to check The local computer has the correct drivers and configuration for the network or the local printer. The doctor needs to grant access to the nurse before. Once finished, the nurse can stick to the desired cart. Please ask the search coordinator to add the patient to the group. Refer to page 20 of the following guide. Please refer to this flagship. If you can't find the patient, please contact recording at 410-955-5000 to check the patient's complete demographic information. Please The administrator of your site, who is your first point of contact for any questions / problems. If the site administrator is not able to assist you, please call the help desk, available 24 hours a day, 7 days a week at 855-284-5465 and ask for help with carelink. Please contact the JHM CARELELINK team at HopkinsCarelink@jhmi.edu. This is not for urgent problems, and the CareLink team will reply within 48 hours. Instructions is a community for the people who like to do things. Come and explore, share, and make your next project with us! Instruments is a community for people who like to do things. Instruments is a community for people who like to do things. Come and explore, share, and make your next project with us! See all 1 PhotoSlot 2, 1995 speed limits! Interesting "virtual velocity" article (July '95). Here is a rare nostalgia car for the mention of honorable: a daughter of the '57 Plymouth with a 318 V-8, double four-barreled four-barrel carbohydrates, three automatic push-push automatic speed, and 831/44 Differential inches of safety differentials. How does 150-more mph work with four people in the sound of car? Jeff Hoelzelallentown, PA.it seems difficult to believe. Although the engine tendency has not tested that exact model in 1958, it is safe to say that the maximum speed of the car was limited to ben below 150 mph from the transmission to three speeds and from the maximum RPM of the engine. The fury was available with a 150 mph speedometer, which may have been more than an optimistic tad, since the actual maximum speed was probably no more than 120 mph. For the period of him, however, the most powerful rage was between a group of producing car eles in the form of a natural size. -And. I would be willing to bet my speed limiter that most MT readers find the events staged, like the high speed article in July, to be only extraordinary excuses for the hot rod throw from a bunch of car performance. Steve Dejacimolaughlin, Nev. And why not? Any excuse to drive a performance machine is good. The positive response to our Cover Story has been overwhelming, which has thought more ways to ficare the latest production machinery. -EDWHY Wasn't Porsche 968 and dodge the stock included in the test to end all the tests ("Virtual Velties")? Mark Wilsoncambridge, Mass. Unfortunately, both 968 and the restivity were not available at the time of the test, but both would absurdly transformed into the respectable numbers. In the past, we have recorded a maximum speed of 154.6 mph in twin-turbo furtivity. And even if we did not have the opportunity to push a 968 to the limit, Porsche publishes a maximum speed of 156 mph for 968 if equipped with the six-speed transmission. -And. The Ford GT probes did not make your list of participants in the "Virtual Veltinal" high-speed shooting, even with the secret of speed \$ 1.98 applied. I was wondering, how much came near the cutoff 140-mph, arrived? C. Martinpittsburgh, PA. We recorded a maximum speed of 133 mph with a Ford GT probe during our 1994 "Bang for the buck" test (AGO.94). Close, but no cigar. -And. As for this old pilot, the problem of your July was useless. With radar, CB radios and mobile phones, What is a 100-plus-mph machine on the highway? Trailer drivers and funeral home are quite busy. J.B. Maasskankakee, Ill.Viper GTScovering Your July issue was another one of those Dodge ads (pages 58-59) with a car under a cloth. What's downstairs? A Chrysler Atlantic? Brad Hansenmuscini, the Iowathe covered machine is a teaser dealing with the next coupé © GTS Viper '96 should start starting production this spring. -And. What year is it? I read Editor C. Van Tune's July Editorial "Great Car-But what year is it?" With particular interest. Be born in I grew up with the car's evolution. I loved the styling and the design of the cars of the 50s. Remembrance of PNEKING A peak under the paintings of the new vehicles while sitting on a car carrier. Was it so exciting or what? Someone said that nowadays if a particular design is successful, then the other producers will follow. I would have just put a set of wheels and a motor on a boiled egg and drive it, at least one egg looks like an egg. I think car manufacturers and designers should take a little risk occasionally. I know it's their perception of the future, but it recently it seems that the future is stopped. Gary Lutherlas Vegas, Nev. If I had a dollar for every time I couldn't identify a car, I would be able to buy that Ferrari F355 you were driving. Not only is it difficult to identify the year, but also the model. For example, the only visual difference between a V-6 Camaro and a V-8 Z28 is the exhaust and a small emblem. Since each generation produces fewer car enthusiasts, the government has a easier time by adjusting cars, emissions centralization tests and crushing old cars. Most Gen-Xers does not like machines the way the boomers did; They are more worried about stereo power. If my engine had some of the power of some of those stereo systems, I would run Warren Johnson for the title of Prostock! Being a 27-year-old gen-Xer, I always thought that I grew up in the wrong decade. Scott Windlephiladelphia, Pa.end of AGEChevrolet Caprice, Buick Roadmaster and Cadillac Fleetwood: These models are part of our automotive culture. Now they are at risk of becoming part of automotive history if GM has its plan to eliminate its last three-wheel drive, V-8-Powered. GM is voluntarily reviewing the market completely to Ford. Fomoco will have a total control of the traditional full-size format, limo, taxi, police, taxi driver and bus markets. Also, people wearing boats or trailers will have to buy Ford or buy trucks. Ford's people have to do cartwheels in anticipation of the market that GM is delivering them on a silver tray. Dale StaffordLeavenworth, kan.sad but true. After the year of the model '96, the production plant of these large GM sedans will be switched to build trucks. -And. The Dreams of Electric Sheepit disappointing disappointing that your May '95 Washington report reports on the government report u.s. Accounting office (Gao) of the Congress only covers the most negative results of the study on electric vehicles (EVS). There is a wide range of information in the studio of 137 pages, including, "EVS produces virtually no tailpipe issue and the net effect on air quality - the savings deriving from the reduction of tailpipe emissions minus comics emissions Additional associated with greater generation of electricity - is generally considered to be significantly less than that of the [internal-combustion-engine vehicles]." As for the cost, EVS are still largely in the demonstration phase. How production volumes increase, costs will decrease proportionately. The rapid development of the EV industry is preparing to meet the needs of consumers. Contrary to your perspective, on an in-depth reading of the GAO report, the EV industry finds its general tone support. Robert T. Haydenexecutive Regiselelectricelector Vehicle Association of the Americas San Francisco, Calif. The question in which the analle saw many cars lowered, similar to racing cars, and I heard that engineers specifically designed vehicles to be a certain terrain height. Lower your car affect engineers' design? If so, change is significant? What are the benefits and disadvantages of lowering Your car?Jodonn P. Diazlemon Grove, Calif. The unexpected owner can easily enter lowering a car. As with many other aspects of a vehicle, the driving height is the judgment of the engineers of the optimal budget between many factors, including the distance of the earth, the quality of the guide, the curve capacity and the entry / exit. Lowering the He also lowers the center of gravity of the machine, reducing the body roll and the improvement of the curvature, but the improved handling is at the expense of the quality of the guide and the distance of the earth. Shock, sources, wheels and tires may have to be modified as part of the package; These components can also be updated to improve handling without lowering. Have the work done at a professional shop specializing in aftermarket performance; You will look and feel that you want the first time. -And. Driving music to someone who loves to listen to high volume music while driving, I'd like to know what kind of music, if present, the staff listens during the car test. Eric RiveraArenville, Ill.While Vehicle Test None. We are focusing on engine sounds, interior noise levels, wind leaks and many other aspects of each car. But when the day of the test is finished and it is time to relax, our tastes manage the range from the 24-hour radio station of Executive Editorial Bob Nagy, the 24-hour radio station of Senior Test Test Editor Mac Demere the format All-Country, and Nine Polling Nail Management Suzanne Editor Perreault CD Collection to Editor C. Van Tune's Stely Dan Library. The best driving song of all time? The rates of the "Radar Love" of the golden earring 1974 are a lot of votes. -And.
