

9. At the end of ecological succession, a stable community is reached. Which of the following best describes a climax community if it left alone?

- A most of the biomass is in lichens
- B it does not contain any animals
- C it changes very quickly
- D it remains until the climate changes

Use the graph to answer questions 10 – 11.

10. Which of the following scenarios could explain the drop in biomass labeled X in the graph to the right?

- A Felled trees are replanted by humans
- B A forest fire is started by lightning
- C Bioaccumulation of toxins affects top predators
- D Pollution in an ecosystem is drastically reduced

11. Based on the data in the graph, what will happen to an ecosystem after its climax community has been destroyed?

- A It will proceed through the stages of succession until it returns to a stable community
- B It will remain in a state of disarray and never recover from the natural disaster
- C The community will recover, but the biodiversity will never be regained
- D The original hardwood forest will forever be replaced by a softwood forest

12. Which statement best describes a pioneer population found in the beginning of ecological succession?

- A They are completely heterotrophic.
- B They do not appear until animals arrive.
- C They modify their environment.
- D They only exist in tropical biomes

13. Starting on barren rock what is the usual ecological succession of organisms?

- A grasses → shrubs → lichens → trees
- B lichens → shrubs → grasses → trees
- C trees → shrubs → grasses → lichens
- D lichens → grasses → shrubs → trees

Answer the following questions about populations, communities and ecosystems.

14. A student surveys her neighborhood and reports that it contains 6 dogs, 4 cats and 1 gerbil. This data best describes the -

- A pet population
- B pet ecosystem
- C pet domain
- D pet community

15. Which of the following describes all of the living and abiotic factors in a geographical area?

- A ecosystem
- B community
- C niche
- D population

16. Which of the sequences below is listed from the least complex to the most complex?

- A ecosystem, community, population
- B population, ecosystem, community
- C population, community, ecosystem
- D community, ecosystem, population

17. All of the members of one species that inhabit a specific area are called -

- A a community
- B an ecosystem
- C a population
- D an organism

18. A plot of land contains soil, decomposers, producers, consistent rainfall, mild temperatures and a community of herbivores and carnivores. This set of data best describes -

- A a community
- B an ecosystem
- C a population
- D an organ system
