The classic paladin tank leveling guide.

It would be nice if you could explain why Darkshore is the best low-level leveling area. Is it because there are so many missions, easy missions or what? I'm really happy with this guide! I feel that the recommended talents really provide a lot of detail with the little choice sprinkled along it. I feel like you really know what you're talking about, and you're not afraid to take my time and do it in the best possible condition. I've never played classic before, but I'm really out. And as someone who loves Paladin/DK Type Lore, I'm going to Pally. Thank you so much for this! I'm not sure if these references to the leveling of the Horde are relevant, considering that the classic champions are just alliance. It would change some things, given my own experiences playing Paladin. 1. Seal Election Pre-21 I'm Surprised that I recommend the Seal of Justice, even with talents, will add about 15% damage per swing. The crusader seal, while not so exciting, inflicts 40% more damage. It has a -Apondamage component, which is annoyed and does not "treat less damage with each swing" as the tool information suggests. This is compensated by the + AP (will balance by the same amount, check your character sheet -> ARMAONDAMAGE FOR THIS!) But you will be attacking 40% faster. As such, the SOR is 10-15% damage, SOCRU is 40%. 2. Parrythis is a very underrated and overrated talent. I know this sounds crazy, but listen to me about how it works: when you look like an enemy, your swing timer is reduced to 50%. You never lose a swing, but depending on the time of your parry vs. your swing, you can cut up to 50% off the SwingTimer. You can see the evidence of this by observing their attacks when they break, or consider why tanks are not automatically performed on the heads of the toughest balance sheets, since the mafias also benefit from this reduction in swing if they break. The slowest weapon possible to give you the highest postical proc% possible on the command seal. with a slower arms swing, you'll benefit more from these.Reductions. In addition, these "sewing reductions" do not affect your base weapon speed, so your SOC% remains the same but you will be doing more attacks per minute - so you will increase your damage Against Melee's stock pretty good. It will stack at the top of its 5% reference, giving an additional reduction of 5% of damage against most of the mobs that are level. It also increases its damage as it will oscillate more often. The best part is when 2 or more mobs are thrown, or against those double murves peeling peeling, or against a peat of A @ lite / name that you are trying to burn, you will get more Parries, MA 5 swing reductions, and therefore better DPS in those crunchy situations. It will be your own preference as to how it built the talents of the willingness in your leveling construction - if you are happy judging less, then replace the benefit. If you want to judge more, or you prefer to use the blessing of wisdom to improve working time, then it replaces the impossible blessing of power. You can fight to kill enemies: especially like a palate, you will not be able to overcome several mobs at a time, or be able to solist a part of ultimately. I would recommend leveling with a warrior or Rogue to balance the leveling speed of your group. In classic, the difficulty of the zones varies, and especially as a palad, will want to make a minor difficulty mission. You will be bouncing between a few areas in any level range. All this is very bad. The paladins take time to level, it is true, but of all the classes the paladins are harder. From Vanilla, they have been recognized for their ability to solve both enormous amounts of mobs and as little mobs that would normally take a party to tear down. May be slow, but you have to try very hard to die to be honest I'm never commenting on things but seeing the things I see here and to learn that / Sit will not work to tell what I intended to do I started looking at this guide and seeing the 22-60 talents that I almost die because this is literally the construction that it was when I was Years of leveling my first character I did. Imagine the efficiency in that construction. After all these years with a normal-functioning brain and well-rounded information that cuts through your worst enemy, while leveling isn't exactly how long it takes you to kill a mafia, it's the moment when you're not doing anything = rain. The optimal build at 10-22 for me is this is a unique just go with this, save your money, level cooking and other profession you want along the way and get extra leveling benefits, you can do all this efficiently with around 5 days/played when 60 with Max Main Fors and Max Primary Auxiliaries and cooking for more hold with Buifs and bandages of spirit, also if going alchemy / grass it would be a good idea if you plan to be a healer for self-sufficiency in raids so that you do not go bankrupt, and all these potions and elixirs will allow you alone "oh # \$% ^^ missions as a boss (you'll still need some kind of cooldowns) to solidify even more my assistance on talents, let's look at In the blessing of power for a blessing of SEC 25AP = 1DPS of MAJOR AP for each rank. Range 1 = 20 Range 2 = 35 R Range 3 = 55 Range 4 = 85 Range 5 = 115 Range 6 = 155 Range 7 = 185bonus AP 5/5 Talent for each Range: Range 1 = 4 Range 2 = 7 Range 3 = 11 Range 4 = 17 Range 5 = 25 Range 6 = 31 Range 7 = 31-32as You can see here from approximate estimates on Max Rank Blessing of talented power BÄ1111; It earns about 1.5 Extra DPSwhere, since the arc range 1 on LVL 14 effectively gives you 10MP5, which means 12 ticks per min x 5 min = 600 free mana in range 1 to keep installing or not, just use the just. it will blow up a little mob. You could argue that it has to do infinite amounts of fighting and it increases efficiency and yes, but it also reduces it by With the configuration of the blessing + the arc, with the arch configuration, it will sit down without doing anything and the only way you kill something is afk aa without using your skills because good or 1 judge by Taking into account also that BoW is mp5 buff that continues even during casting and between 2 judgments that is 8 seconds also retain 1 tick of your mana spirit regen among judgments due to the 5-second rule regardless of the server ticks due to the cooling that is 8 seconds talented. Btw do not judge a mob if it is about to die in the next automatic attack and let your mana regen continue to flow to hit the next hardest xD and prioritize the bandage if it is available instead of casting. The trick here would be a blessing of wisdom + blessing + enhanced judgment and try to judge in cd while maintaining a decent mana pool, in other words play smart and early planning «How much blood do you have to pour without stopping by the Lord of Light?» (word game) Not only do you decrease your death timer probably about 8 seconds by turba (say 2 judges = 2 aa with a speed weapon). If you have 45V1+ you may want to consider taking the version with talent as well as around this time the percentage increases become sufficiently relevant, as to what you should fall for it I would probably say that the talent of strength so you can maintain your viability as a healer in 5 men thought that this could come to personal preference. Finishing the suggestive ret tree that looks like this 5/5 conviction finish parry ■ Santidad verbal 2 hands 1 SoC (we take this for more durable fights like elites etc that we will try to do so if there are no other options available) and the rest should be Finally this is the construction of 60 lvl:increasing even more efficiency, dps, oh @# button buff and allowing you more or less with some healing equipment to be useful as a high level healer dungeons that you probably will have have Do a lot to get that sweet and easy place and get your healing team for 60 if you are interested in assaulting. I hope this helps some people because it took a long ass time to write all things in a rather decent XD order. In my own experience, leveling on private servers several times, benefits much more from the blessing of wisdom while leveling than the blessing of the powers. POWER's increase in DPS is marginal at best, even when you are talented, while wisdom significantly reduced the frequency at which you need to sit and drink to regain mana, especially important when you reach level 25. In addition, the crusader seal should only be used with very slow weapons (3.5 attack and climb rate) Since your PROC can only occur so many times per minute, a slower weapon will be processed over more swings, and will deal with greater damage due to the Escalation with Damage proc. gun. With faster weapons (like some of the 2.5-speed weapons they suggest) The seal of justice provides a significantly more DPS. It would also be advisable to mention the Verigan Weapon Fist, obtained through a class search available at level 20, as this is a very powerful weapon that can be used in the 30's if you are not lucky enough to get a drop of arms from a dungeon, or you find it different.cil getting a group together. Actually, completing the search on level 20 can do some doing, as it requires going through SFK, which is not the easiest dungeon for the alliance, but there are a number of class missions that require it, so it shouldn't be too expensive. The level of lound 30-35ish also has the option of switching to a protection-based reflex construction, and then proceed to recommend buying new rows of command seal, which only increase the damage of the Judgment. You didn't think about it. This guide is average at best. I've been looking at this guide and reading the comments, and apparently none of them followed correctly. Today lvl 24, with 5/5 strength-size of saint, and the Judgment blessing, imp judge, and parry of the retribution. At this moment I feel really at a crossroads, as I have not found a 2h slow weapon that will justify getting Command Seal but I will not really get much of going holy for a while either. I'm on my way to get Verigan's fist soon too, and I really like to go to dungeons with pugs where I fill whatever paper is necessary (usually healer.) I'm committed to the consecration for that sweet-and the chance to get 5/5 int too, or stick to go ret so that you can really carry out in the terrifying big open world? I have to ask you, don't you think you spend 5 5 In the divine intellect is better on the learn how to efficiently level your Paladin all the way to level 60.
