Hair color for the movie, see red hair (movie). "Redhead" redirects here. For other uses, see the redhead (disambiguation). Woman with red hair actor Rupert Grint with red hair. Portrait of Ismail I of red hair of Persia (also known as orange hair and ginger hair). It is a hair color found in one of 2% of the human population, which appears more frequently (two to six percent) among the people of the North or Northwest of European descent and minor frequency in other populations. It is more common to homozygous individuals for a recessive allele on chromosome 16 which produces an altered version of the MC1R protein [1] red hair vary in shades from a deep burgundy or brilliant copper, or copper, to burn orange or red-orange to blond strawberries. Featuring high levels of the reddish pheomelanin pigment and relatively low levels of the dark eumelanin pigment, it is associated with fair skin color, lighter eye color, freckles and sensitivity to ultraviolet light. [2] Cultural reactions to red hair are varied from ridiculous to admiration with many common stereotypes existing regarding redheads. The term Redhead has been in use by at least 1510. [3] Modern Northern European and Western geographical distribution The British teenager with red hair Red hair is most commonly found in the northern and western fringes of Europe; [4] It is centered on the populations in the British islands and is particularly associated with Celtic nations. [4] Ireland has the largest number of red-haired people per capita in the world with the percentage of those with red hair to about 10%. [5] Great Britain also has a high percentage of people with red hair. In Scotland around 6% of the population has red hair; With the maximum concentration of red head carriers in the world found in Edinburgh, making it the capital of the redhead of the world. [6] [7] In 1907, the largest hair color studio in Scotland, which analyzed over 500,000 people, found the percentage of Scottish with red hair to be 5.3%. [8] A 1956 studio of hair color among the recruits of the British army has also found high levels of red hair in Wales and in the counties of the Scottish border of England. [FN 1] [9] Eastern Europe and Southern Europe A Roman fresco depicting Bacchus with red hair, Boscoreale, C. 30 BC in Italy, red hair lies at a frequency of 0.57% of the total population, without variation frequency through the different regions of the country. [10] In Sardinia, red hair is at a frequency of 0.24% of the population. [10] Ethnographers of the Victorian era considered the à €
